

EZClean CLADD

Alkaline Cleaner Additive

Description

EZClean CLADD is a clear liquid mixture of mildly alkaline cleaning agents and surfactants. It is designed to effectively clean off a variety of metalworking compounds from metals by hot tank immersion methods. EZClean CLADD has been formulated to be used as a medium duty cleaner or with caustic soda as an additive in heavy duty cleaning solutions.

Applications

EZClean CLADD is designed as an inline and soak cleaner to remove residue present on

- Nail Stock
- Hanger wire
- Drawn wire
- Also a wide variety of other finished or in-process wire
- Woven fence

Operating Parameters

Parameters	
Concentration without caustic soda	5 - 20 ounces per gallon of water
Concentration with caustic soda	2 - 5 ounces per gallon of water with 8 - 20 ounces per gallon of caustic soda 50% liquid.
Bath Temperature	170° - 210° F

Properties

Properties	
Appearance	Clear liquid
Solubility	Water soluble

EZClean CLADD does not contain strong alkali and will not react violently with water.

Packaging

EZClean CLADD is available in 55-gallon plastic drums.
