

## EZClean CLW

### Multi-Purpose Cleaner

## Description

EZClean CLW is an off-white concentrated liquid of non-alkaline cleaning agents and surfactants. It is designed to effectively clean off a variety of soils from wire, equipment, floors and walls. EZClean CLW cleaning solutions will leave metal surfaces water-break and smut-free when used properly.

## Applications

EZClean CLW is designed as an inline and soak cleaner to remove residue present on:

- Nail Stock
- Hanger wire
- Drawn wire
- Finished or in-process wire, equipment, floors and walls
- Woven fence

## Operating Parameters

Parameters	
Concentration	5 - 20 ounces per gallon of water
Bath Temperature	170° - 210° F

Concentration testing: - Pipette a 25 ml. sample of the cleaner solution into approximately 75 ml. of distilled water and three drops of phenolphthalein indicator. Titrate solution with 1.0N acid until the pink/red color from the indicator disappears. Each ml. of acid required to reach the indicator endpoint is equivalent to 1.0 ounces/gallon of EZClean CLW cleaner.

## Properties

Properties	
Appearance	Off white liquid
Solubility	Water-soluble

EZClean CLW does not contain strong alkali and will not react violently with water greatly reducing any safety issues you may have with your current cleaner.

## Packaging

EZClean CLW is available in 55-gallon plastic drums and 5-gallon pails.
