

EZCoat ESO

Corrosion Inhibitor

Description

EZCoat ESO oil is a light mineral oil-based rust preventative and lubricant that is used on ferrous wire or other ferrous surfaces.

Applications

EZCoat ESO oil is used on stored wire or for preventing rust during transportation. The unique formula of EZCoat ESO allows it to act as a low viscosity lubricant which can aid in the packing of wire onto take-up reels and spools. It can also be used as a cleaning solvent in the last hole to remove soap lubricant residuals while still providing excellent finish die life.

Operating Parameters

EZCoat ESO is used in its "as received" form either by flooding, submersing, wiping or spraying.

Properties

Properties	
Viscosity at 100° F	100 - 120 SUS
Flash Point (COC)	345° F (174° C)
Specific Gravity at 60° F	0.90

Packaging

EZCoat ESO is available in 55-gallon drums and 275-gallon totes.
