

## EZClean LBA

## Lime Bath Conditioner

### Description

EZClean LBA is a clear-colorless liquid surfactant and lubricant additive package for lime baths. It is a highly effective, low cost, method of aiding in the uniform coating of lime precoats while reducing rust and foaming.

### Applications

EZClean LBA is equally effective in batch and Loopro applications. Designed to reduce foaming and improve coating deposition, EZClean LBA will enhance the uniformity of lime coatings, which impacts drawability and minimize flash rusting.

### Operating Parameters

Parameters	
Make-up Concentration	5 - 20 ounces per 1000 gallons of water
Daily Additions	2 - 5 ounces per 1000 gallons of water
Bath Temperature	170° - 210° F

### Properties

Properties	
Appearance	Clear liquid
Solubility	Water soluble
Density, lbs / gal.	8.45

EZClean LBA does not react violently with lime/water.

### Packaging

EZClean LBA is available in 5 gallon pails and 55-gallon plastic drums.
