

EZDraw 2000

Heavy Duty Powdered Lubricant

Description

EZDraw 2000 is a high titer, rich, soluble soap with lubricant additives to be used as a cold forming lubricant. It is manufactured under controlled conditions that ensure product uniformity and low moisture. EZDraw 2000 is supplied as a powder and is soluble in hot water.

Applications

EZDraw 2000 is recommended for use in light to medium duty cold forming operations. It can be used as a non-reactive coating in conjunction with zinc phosphated or heavy iron phosphated components to enhance film thickness and adhesion for deep drawing.

Operating Parameters

- Dissolve in hot water at 4 to 40 oz./gal
- Mix temperature is 180° to 200° F
- Operating temperature 170° F Min.

Properties

Properties	
Appearance	Off white free flowing fine powder
Solubility	Completely soluble
Moisture	10% max.
Odor	Pine

Packaging

EZDraw 2000 is available in 280 lbs fiber drums or 1500 lbs supersacks.
