

EZDraw EMULS9

Emulsifier Additive

Description

EZDraw EMULS9 is a concentrated blend of emulsifiers and pH buffers that when added to a lubricant system will improve detergency and stability properties of the solution. Using EZDraw EMULS9 will help extend lubricant solution life and enhance system cleanliness, metal wetting and fines filtration.

Applications

EZDraw EMULS 9 is compatible with all lubricants and readily mixes in a circulating system. It is non-reactive with metals.

Operating Parameters

Parameters	
Appearance	Water white to pale yellow liquid
Solubility	Water-soluble
Density	Approximately 8.5 lbs / gal

Properties

EZDraw EMULS9 should be added at a rate of 0.1 to 0.5% by volume depending on degree of system dirtiness or oil separation. Best results are obtained if emulsion temperature during treatment is maintained at 110°F to 140 °F (43°C -60°C).

Packaging

EZDraw EMULS9 is available in 5-gallon pails and 55-gallon plastic drums.
