

EZDraw SS1

Wire Drawing Oil

Description

EZDraw SS1 special blend of low viscosity oils compounded with extreme pressure additives, resulting in a lubricant with excellent wetting properties, high film strength, and superior boundary lubrication at high loads. It provides maximum die protection and leaves the wire finish clean and bright.

Applications

- EZDraw SS1 is formulated to be a superior drawing lubricant for stainless steel and alloy fine wire drawing
- EZDraw SS1 can be used to draw small diameter stainless steel tubing

Operating Parameters

Use as received in either individual lubricant supply systems or central systems. The largest volume of oil that is practical and economical for each plant system is recommended to provide maximum cooling. For the longest possible production life, an efficient filtration system is suggested to maintain the product in its optimum condition.

Properties

Properties	
Appearance	Clear Amber Fluid
Viscosity @100° SUS	120
Wt. / Gal. (Lbs.)	7.3
Sulfur %	2.0
Chlorine %	2.0

Packaging

EZDraw SS1 is available in 55-gallon steel drums and 275-gallon totes.
